

# HIPORE™ PLASTER

## Skin Barrier Microporous Surgical Tape

**Description:** HIPORE™ is a medical grade Surgical Tape, backed by non woven fabric made of 100% viscose & uniformly coated with hypoallergenic acrylic adhesive.

**Application:** HIPORE™ is suitable for long term gauge & dressing fixation & for securing intravenous needles, medical devices, electrodes & tubings on skin.

**Advantages:** HIPORE™ being hypoallergenic can be safely used on sensitive parts of the body & also on infants & people with allergy. The tape is comfortable, easy to tear, radio transparent & is highly permeable to air & water, preventing maceration of skin.
